## INTRODUCTION

*By Force and Without Consent: A Five Year Overview of Sexual Violence in South Carolina 2007 – 2011* is the third in a series of ongoing reports, designed to provide basic information about victims of sexual violence over a five year period. The information presented in the tables, graphs and charts in this publication is based on incident reports submitted to the South Carolina Law Enforcement Division (SLED) by state and local law enforcement agencies. These reports are edited and reviewed, corrected as needed and compiled to form the basis of the information presented in this report. It is important to note that the information in this report is only as complete and accurate as the information reported to local law enforcement and subsequently submitted to SLED. By their very nature, unreported crimes cannot be included in the report. While there are a variety of legal and social definitions of sexual violence, this report uses a broad definition of sexual violence, parsed into meaningful sub-categories, in order to provide as much useful information as possible. This report seeks to provide information concerning the scope and nature of sexual violence at the state level; however another important objective of this report is to provide information concerning short term trends and the characteristics of sexual violence victims at the county level.

We wish to express our thanks and appreciation to the sheriffs, chiefs of police, state and local law enforcement officers and administrative staff that provide the data upon which this report is based. The difficult work involved in gathering, reviewing and submitting crime and arrest data, in addition to the primary responsibility of responding to crime, makes publication of this report possible. It is also important to note that publications such as this would not be possible without the ongoing and active assistance of SLED's Crime Information Center. The report itself is a product of the South Carolina Department of Public Safety, Office of Highway Safety and Justice Programs Statistical Analysis Center; funded in part by the United States Department of Justice, Bureau of Justice Statistics.

## COUNTING AND DEFINING SEXUAL VIOLENCE

These notes are intended to provide a brief overview of how information concerning sexual violence is collected and compiled. They are not intended to be a comprehensive description of crime reporting methods. Rather they are intended to give the reader a working knowledge of the uses and limitations of crime data and provide an understanding of how this information can be used to describe the nature, extent and associated trends of sexual violence in South Carolina.

Data from the South Carolina Incident Based Reporting System (SCIBRS) provides the basis of this report. SCIBRS data starts with the statewide uniform incident report. An incident report is filled out whenever a criminal event is reported to law enforcement. The responding officer fills out the incident report which contains detailed information about the incident, the victim and the offender as well as any associated arrests. This information is then entered into SCIBRS, which is maintained by SLED. Analysis of SCIBRS data will often vary from published crime rates, arrest rates and counts of each for a variety of reasons. Chief among these is that SCIBRS data allows for the flexibility to use whatever unit of count (victim, offense, offender, arrestee, etc.) is most appropriate. The unit of count used throughout this report is that of victim; however there are nuances associated with some factors that can result in different totals. These situations are noted and explained throughout the report. Additionally, edits, updates and corrections are made over a two-year period in order to provide agencies with the maximum window of opportunity to report as fully and accurately as possible. As a result, totals from a specific year can subsequently vary from previously published totals for that same year. Any data published here concerning figures for prior years supersede those published in previous reports. It is also important to be aware that SCIBRS does not restrict analysis to use of the most serious offense, as is often the case with reported crime rates. SCIBRS data from 2007 through 2011 provides the primary source of crime data for this report. The sum of categories for some tables, charts or graphs may not total 100% due to rounding.

Sexual violence was defined as an incident in which one of the following offenses was reported against an individual: rape, forcible sodomy, sexual assault with an object and forcible fondling. Victimization rates were calculated using the equation below:

$$\text{Victimization Rate} = \frac{\text{Number of Victims}}{\text{Population (or sub-population)}} \times 10,000$$

The County Rankings and County Five Year Trends & Profiles sections provide information regarding victims of sexual violence and victimization trends for each county in the state. While the intent is to provide the most detailed level of information as possible, it is important to consider the information in the proper context. The reader should be aware that small numbers can sometimes magnify annual trends or aspects of victim profiles beyond their actual importance. For example, if the number of victims changes from two to four from one year to the next, that represents a 100% increase. However, that large percentage increase is based on a very small number of victims and

in reality may not represent a drastic change. Victimization rates in counties with small populations are subject to seemingly large changes that are the result of small changes in the actual number of victims. Similarly, the implications for a county in which a very high percentage of the victims of sexual violence are children might differ based on the total number of victims. If the total number of victims is very small an observed change might be the result of a minor fluctuation in the numbers. If the total number of victims is substantial, then an observed change might be viewed quite differently. While this report seeks to include as much information as possible, it is important that the reader be mindful of such pitfalls. In the end, statistical information is no substitute for critical review and considered judgment.

State and county population estimates used to calculate victimization rates were provided by the South Carolina Budget and Control Board, Office of Research and Statistics (ORS).

# **STATEWIDE FIVE YEAR OVERVIEW**

***Forcible fondling was the most frequently reported sexual violence offense, accounting for 43.1% of sexual violence offenses.***

**SEXUAL VIOLENCE:** Sexual violence consists of the offenses of rape, forcible sodomy, sexual assault with an object and forcible fondling.

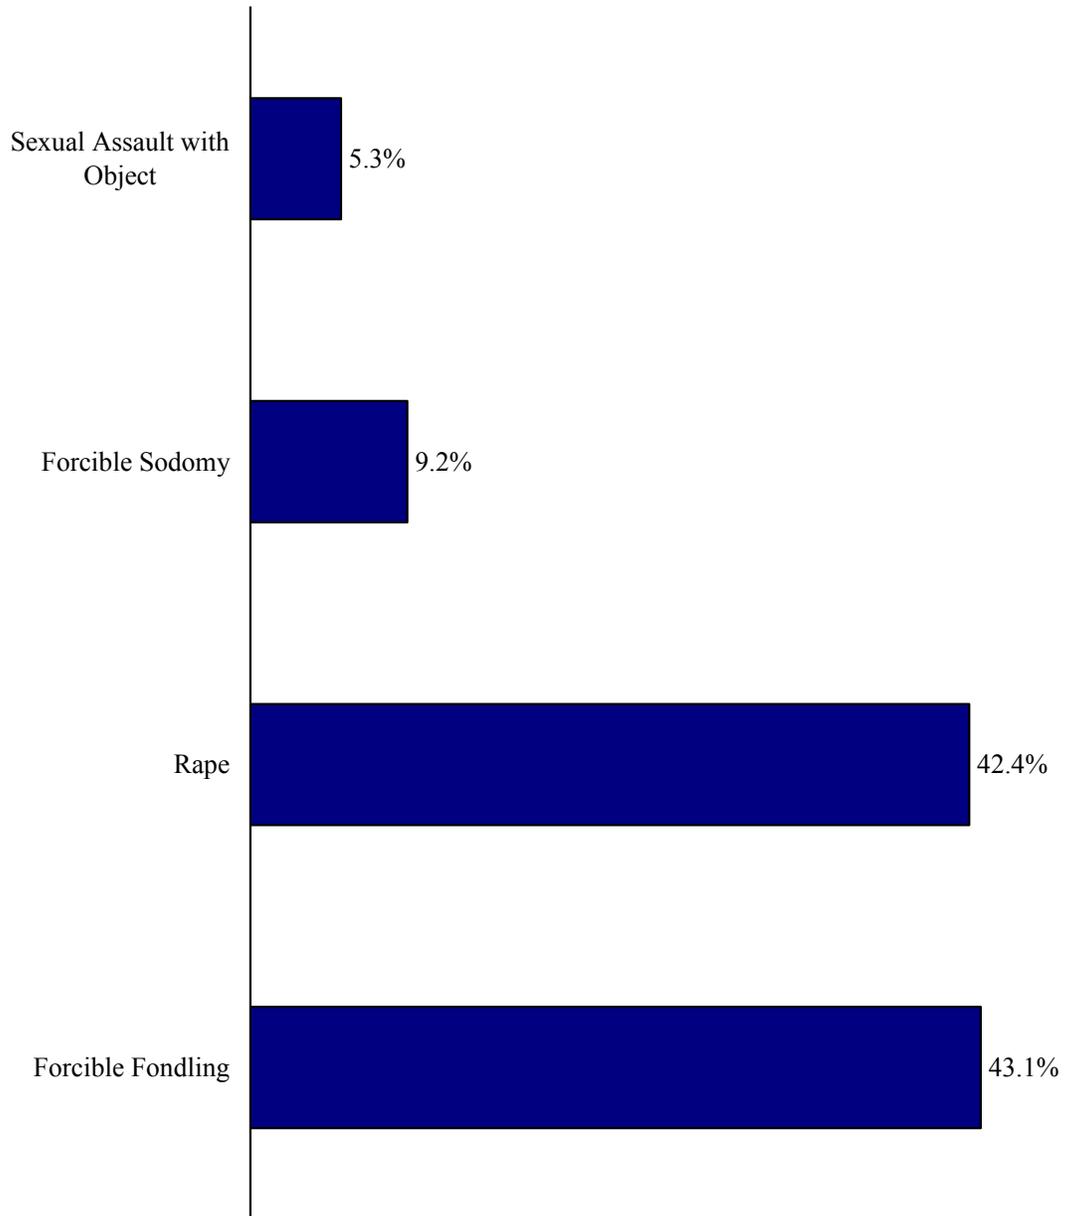

**SEXUAL VIOLENCE OFFENSES  
2007 – 2011**

<b>Offense</b>	<b>Number</b>	<b>Percent</b>
Rape	8,136	42.4%
Forcible Sodomy	1,776	9.2%
Sexual Assault with Object	1,025	5.3%
Forcible Fondling	8,268	43.1%
Total	19,205	100.0%

Notes: SCIBRS allows up to five offenses, including but not limited to the four offenses listed above, to be reported for each victim. As a result, more than one violent sexual offense is sometimes reported per victim. The 19,205 violent sex offenses listed above represent the total number of sexual violence offenses committed against 19,062 victims of sexual violence.

Source: SCIBRS, SLED.

## Sexual Violence Offenses 2007 - 2011

***Kidnapping was the offense most often reported in association with sexual violence offenses.***

**OTHER OFFENSES:** SCIBRS records up to five offenses per victim. Offenses other than those defined as sexual violence are sometimes committed and reported in association with sexual violence offenses.

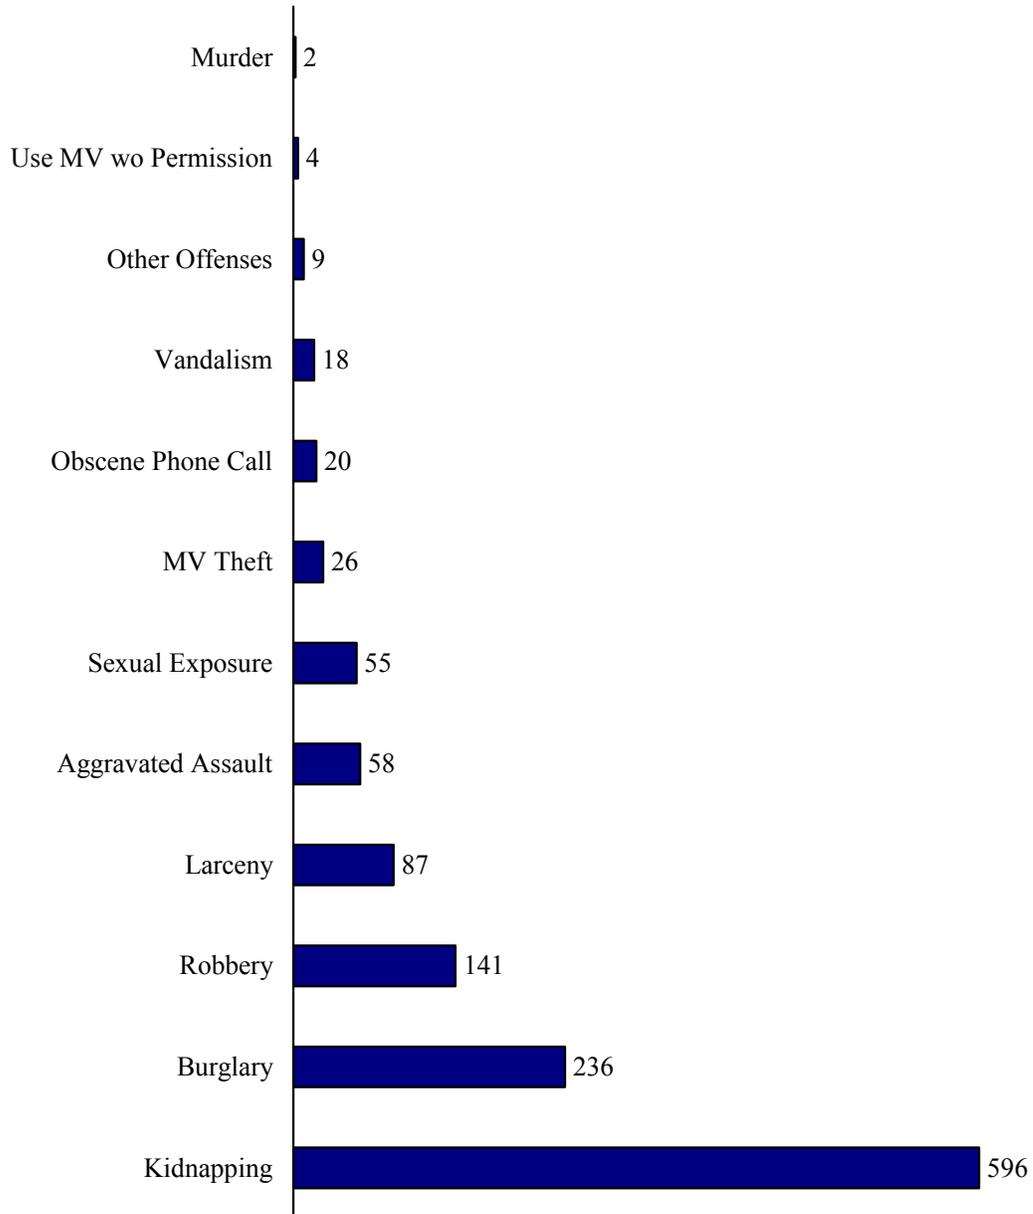

**OTHER OFFENSES ASSOCIATED WITH SEXUAL VIOLENCE  
2007 – 2011**

<b>Offense</b>	<b>Number</b>	<b>Percent</b>
Aggravated Assault	58	4.6%
Burglary	236	18.8%
Kidnapping	596	47.6%
Larceny	87	6.9%
Motor Vehicle Theft	26	2.1%
Murder	2	0.2%
Obscene Phone Call	20	1.6%
Other Offenses	9	0.7%
Robbery	141	11.3%
Sexual Exposure	55	4.4%
Use of Motor Vehicle without Permission	4	0.3%
Vandalism	18	1.4%
Total	1,252	100.0%

Notes: Up to five offenses can be reported per victim. The 1,252 offenses above represent the offenses other than sexual violence reported as having been committed against the 19,062 victims of sexual violence.

Source: SCIBRS, SLED.

## Offenses Associated with Sexual Violence 2007 - 2011

*Sexual violence was reported most frequently between midnight and 12:59 AM.*

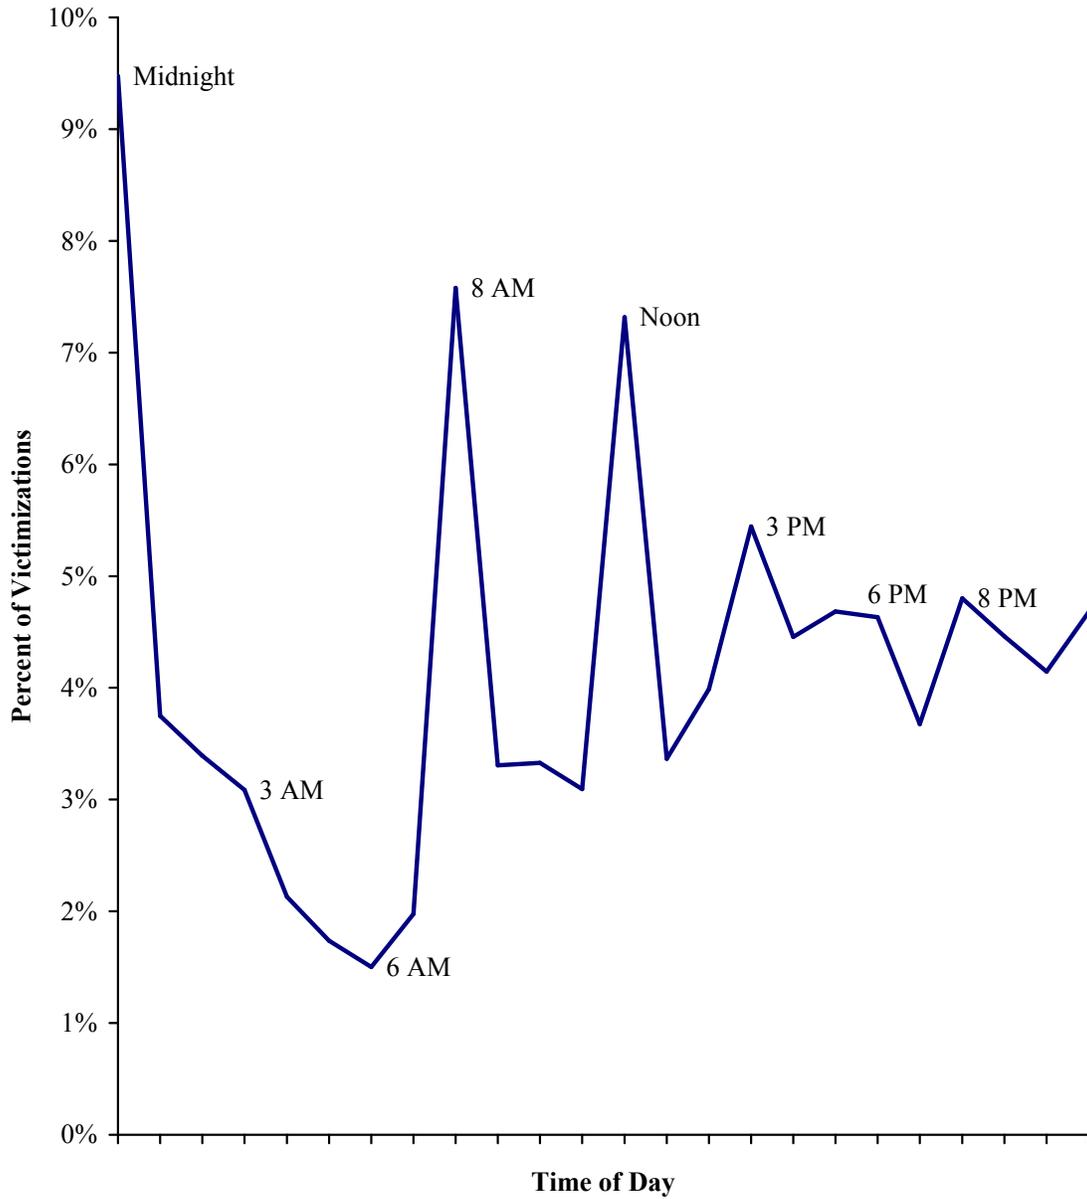

**SEXUAL VIOLENCE BY TIME OF DAY  
2007 – 2011**

<b>Time of Day</b>	<b>Number</b>	<b>Percent</b>
Midnight - 12:59 AM	1,774	9.5%
1:00 - 1:59 AM	702	3.7%
2:00 - 2:59 AM	635	3.4%
3:00 - 3:59 AM	578	3.1%
4:00 - 4:59 AM	399	2.1%
5:00 - 5:59 AM	325	1.7%
6:00 - 6:59 AM	281	1.5%
7:00 - 7:59 AM	370	2.0%
8:00 - 8:59 AM	1,419	7.6%
9:00 - 9:59 AM	619	3.3%
10:00 - 10:59 AM	623	3.3%
11:00 - 11:59 AM	579	3.1%
Noon - 12:59 PM	1,370	7.3%
1:00 - 1:59 PM	630	3.4%
2:00 - 2:59 PM	747	4.0%
3:00 - 3:59 PM	1,019	5.4%
4:00 - 4:59 PM	834	4.5%
5:00 - 5:59 PM	877	4.7%
6:00 - 6:59 PM	867	4.6%
7:00 - 7:59 PM	688	3.7%
8:00 - 8:59 PM	899	4.8%
9:00 - 9:59 PM	835	4.5%
10:00 - 10:59 PM	776	4.1%
11:00 - 11:59 PM	876	4.7%
Total	18,722	100.0%

Note: A total of 340 victims were missing time of day data.

Source: SCIBRS, SLED.

## Sexual Violence by Time of Day 2007 - 2011

*The pattern of victimization by time of day was different for children and adults. Victimization of children was most frequent at midnight, but also spiked at 8:00 AM, noon and 3:00 PM. Sexual violence against adults increased steadily during the evening hours, peaked at midnight and decreased gradually through the early morning hours.*

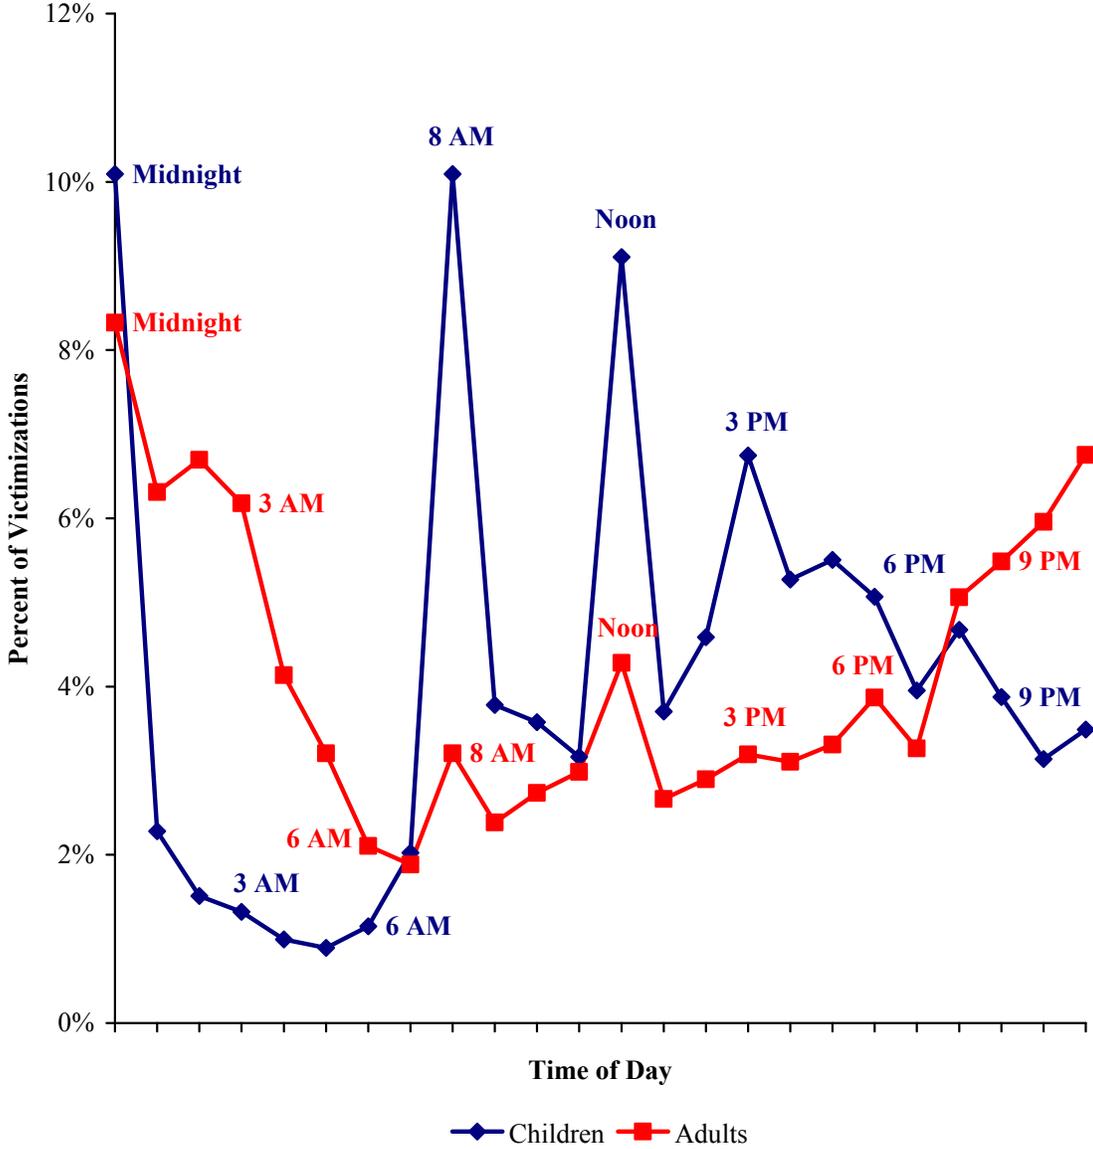

**SEXUAL VIOLENCE BY TIME OF DAY  
COMPARING CHILDREN AND ADULT VICTIMS  
2007 – 2011**

<b>Time of Day</b>	<b>Children</b>	<b>Adults</b>
Midnight - 12:59 AM	10.1%	8.3%
1:00 - 1:59 AM	2.3%	6.3%
2:00 - 2:59 AM	1.5%	6.7%
3:00 - 3:59 AM	1.3%	6.2%
4:00 - 4:59 AM	1.0%	4.1%
5:00 - 5:59 AM	0.9%	3.2%
6:00 - 6:59 AM	1.1%	2.1%
7:00 - 7:59 AM	2.0%	1.9%
8:00 - 8:59 AM	10.1%	3.2%
9:00 - 9:59 AM	3.8%	2.4%
10:00 - 10:59 AM	3.6%	2.7%
11:00 - 11:59 AM	3.2%	3.0%
Noon - 12:59 PM	9.1%	4.3%
1:00 - 1:59 PM	3.7%	2.7%
2:00 - 2:59 PM	4.6%	2.9%
3:00 - 3:59 PM	6.7%	3.2%
4:00 - 4:59 PM	5.3%	3.1%
5:00 - 5:59 PM	5.5%	3.3%
6:00 - 6:59 PM	5.1%	3.9%
7:00 - 7:59 PM	4.0%	3.3%
8:00 - 8:59 PM	4.7%	5.1%
9:00 - 9:59 PM	3.9%	5.5%
10:00 - 10:59 PM	3.1%	6.0%
11:00 - 11:59 PM	3.5%	6.8%
Total	100.0%	100.0%

Notes: Children are defined as being 17 years of age or younger at the time of victimization, adults are defined as being 18 years of age or older at the time of victimization.

Source: SCIBRS, SLED.

# Sexual Violence by Time of Day Comparing Children and Adults 2007 - 2011

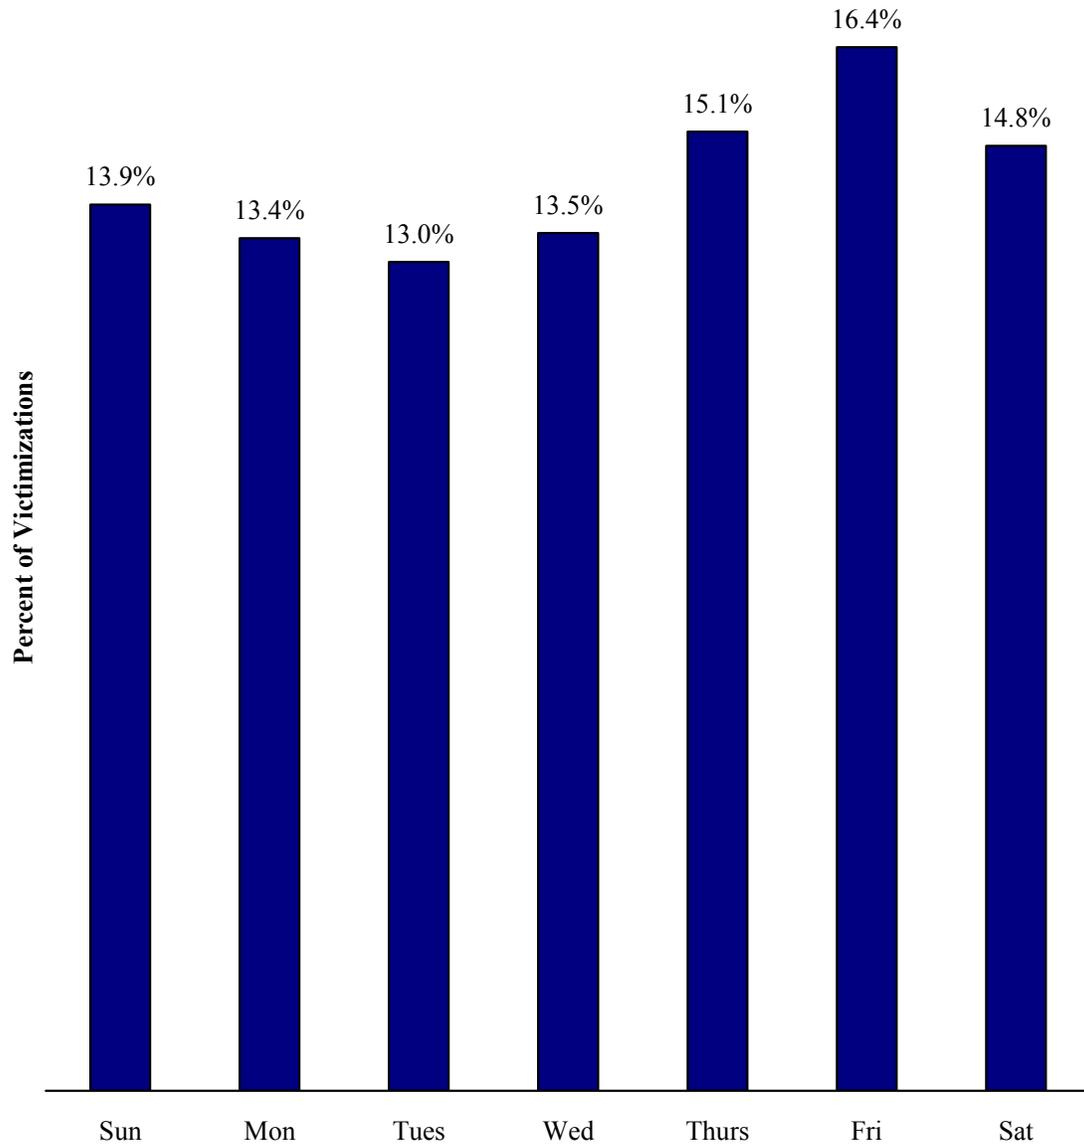

*More sexual violence was reported on Friday than any other day of the week.*

**SEXUAL VIOLENCE BY DAY OF THE WEEK  
2007 – 2011**

<b>Day of the Week</b>	<b>Number</b>	<b>Percent</b>
Sunday	2,651	13.9%
Monday	2,550	13.4%
Tuesday	2,479	13.0%
Wednesday	2,566	13.5%
Thursday	2,869	15.1%
Friday	3,121	16.4%
Saturday	2,826	14.8%
Total	19,062	100.0%

Source: SCIBRS, SLED.

## Sexual Violence by Day of the Week 2007 - 2011

*The most frequent day of the week/time of the day during which sexual violence victimization was reported was midnight on Sunday.*

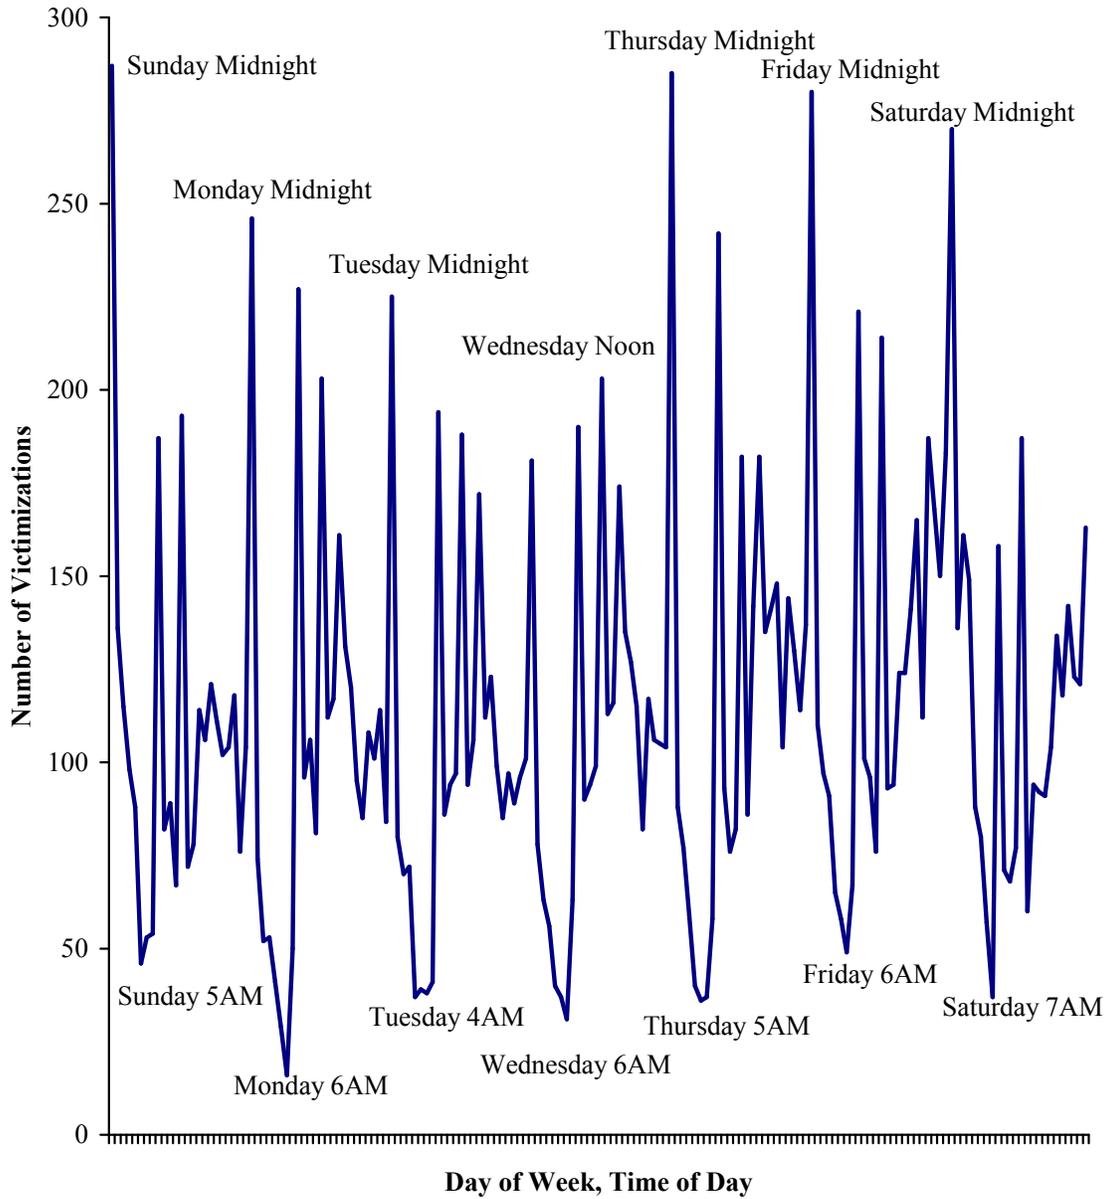

**SEXUAL VIOLENCE VICTIMIZATION  
BY DAY OF WEEK/TIME OF DAY  
2007 – 2011**

<b>Day &amp; Time of Victimization</b>	<b>Number</b>	<b>Percent</b>
Sunday Midnight	287	1.53%
Thursday Midnight	285	1.52%
Friday Midnight	280	1.50%
Saturday Midnight	270	1.44%
Monday Midnight	246	1.31%
Thursday 8 AM	242	1.29%
Monday 8 AM	227	1.21%
Tuesday Midnight	225	1.20%
Friday 8 AM	221	1.18%
Friday Noon	214	1.14%
Monday Noon	203	1.08%
Wednesday Noon	203	1.08%
Tuesday 8 AM	194	1.04%
Sunday Noon	193	1.03%
Wednesday 8 AM	190	1.01%
Tuesday Noon	188	1.00%
Sunday 8 AM	187	1.00%
Friday 8 PM	187	1.00%
Saturday Noon	187	1.00%
Friday 11 PM	183	0.98%
Thursday Noon	182	0.97%
Thursday 3 PM	182	0.97%
Wednesday Midnight	181	0.97%

Notes: Only days of the week/times of the day accounting for 0.95% or more of the 18,722 sexual violence victimizations with time of day data are included in the chart above. The highlighted days of the week/times of day represent the most frequently reported time of day for that day of the week. Times represent the hour from the time noted up to the start of the following hour; e.g., Friday 8 AM includes any sexual violence victimization reported from 8:00 AM on a Friday through 8:59 AM on Friday.

Source: SCIBRS, SLED.

# Sexual Violence by Day/Time of Day 2007 - 2011

*The most frequently reported type of injury inflicted upon victims of sexual violence was minor injuries. Two deaths (murders) were associated with sexual violence.*

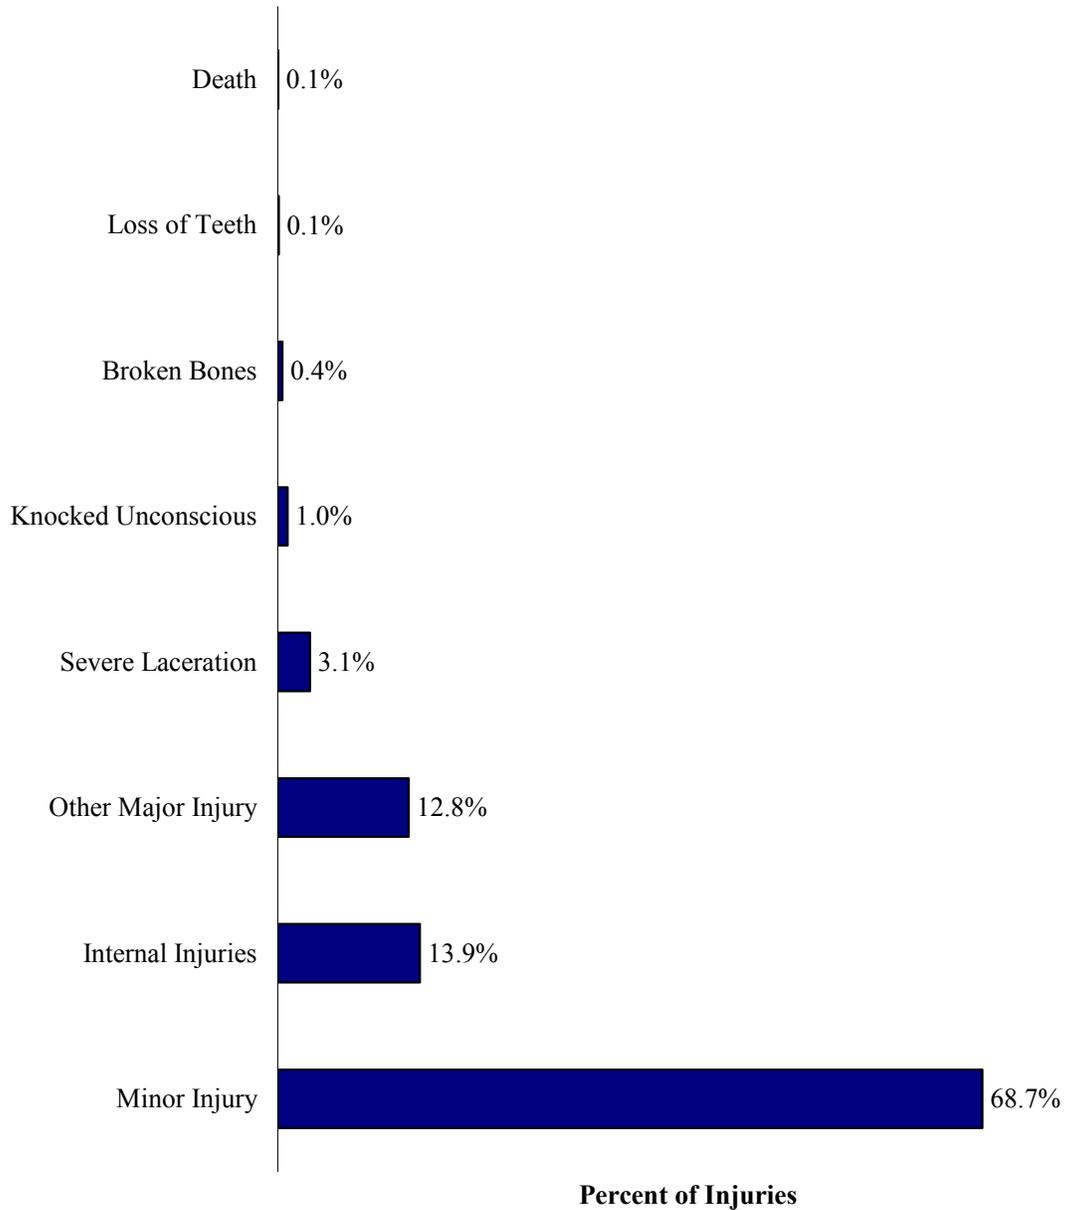

**SEXUAL VIOLENCE INJURIES  
2007 – 2011**

<b>Injury</b>	<b>Number</b>	<b>Percent</b>
Broken Bones	16	0.4%
Death	2	0.1%
Internal Injuries	502	13.9%
Knocked Unconscious	35	1.0%
Loss of Teeth	4	0.1%
Minor Injury	2,488	68.7%
Other Major Injury	462	12.8%
Severe Laceration	114	3.1%
Total	3,623	100.0%

Notes: Up to five injuries can be reported per victim. The 3,623 injuries and deaths above represent injuries inflicted upon 3,539 victims. No injuries were reported for 15,523 victims.

Source: SCIBRS, SLED.

## Sexual Violence Victimization Injuries 2007 - 2011

*The sexual violence victimization rate among girls and women was 14 per 10,000; the sexual violence victimization rate among boys and men was 2.4 per 10,000.*

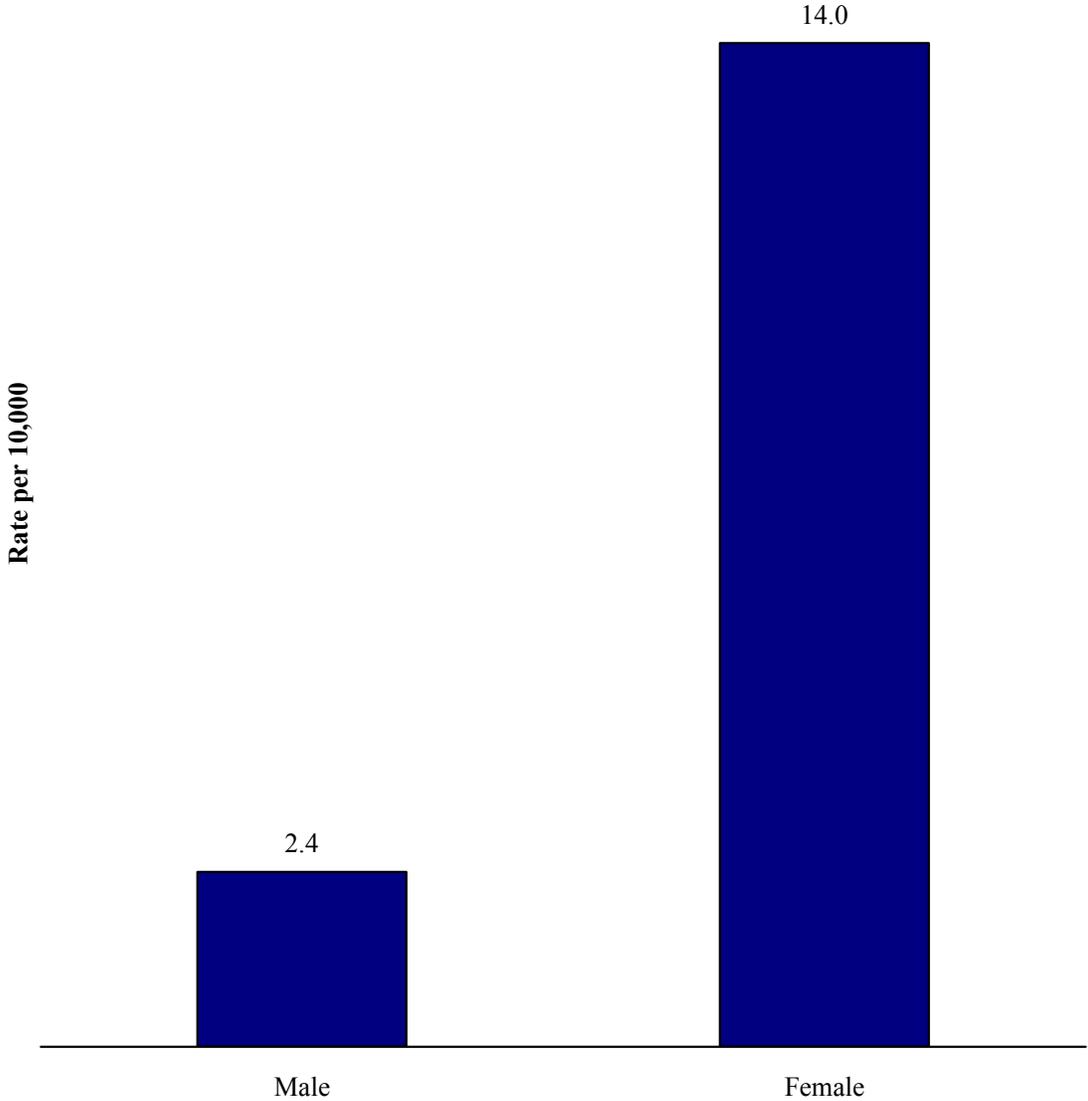

**SEXUAL VIOLENCE VICTIMS BY SEX  
2007 – 2011**

<b>Sex</b>	<b>Number of Victims</b>	<b>Percent</b>	<b>Rate</b>
Female	16,346	85.8%	14.0
Male	2,701	14.2%	2.4
Unknown	15	0.1%	NA
Total	19,062	100.0%	8.4

Note: Victimization rate is expressed per 10,000.

Source: SCIBRS, SLED.

# Sexual Violence Victimization by Sex 2007 - 2011

*The sexual violence victimization rate for children was 5.6 times the victimization rate among adults. The highest sexual violence victimization rate was reported among the ten to fourteen year old age group.*

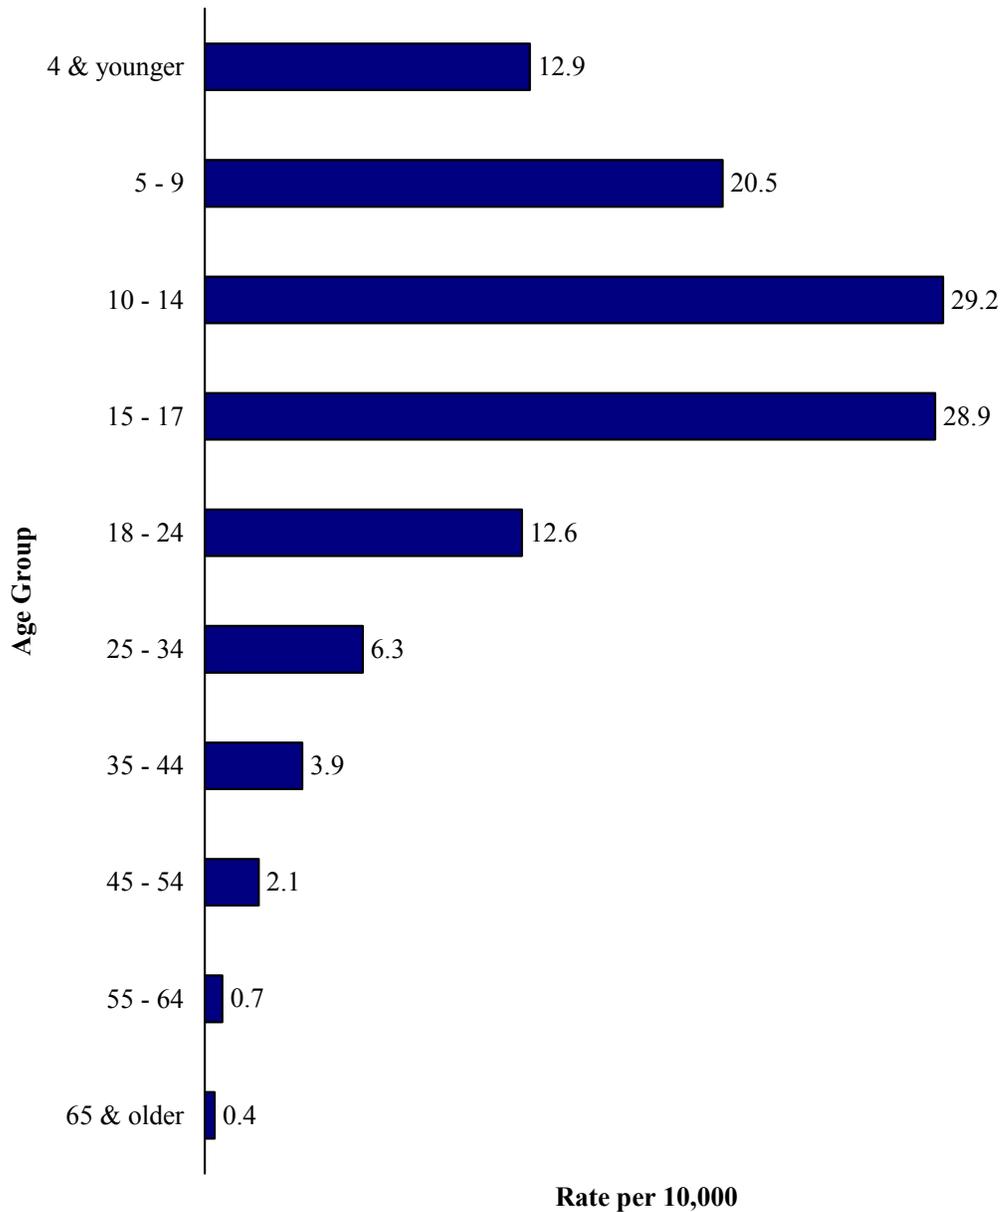

**SEXUAL VIOLENCE VICTIMS BY AGE  
2007 – 2011**

<b>Age Group</b>	<b>Number of Victims</b>	<b>Percent</b>	<b>Rate</b>
<b>Children</b>	<b>11,927</b>	<b>62.6%</b>	<b>22.2</b>
4 & younger	1,949	10.2%	12.9
5 – 9	3,007	15.8%	20.5
10 – 14	4,264	22.4%	29.2
15 – 17	2,707	14.2%	28.9
<b>Adults</b>	<b>6,867</b>	<b>36.0%</b>	<b>4.0</b>
18 – 24	2,848	14.9%	12.6
25 – 34	1,843	9.7%	6.3
35 – 44	1,167	6.1%	3.9
45 – 54	691	3.6%	2.1
55 – 64	196	1.0%	0.7
65 & older	122	0.6%	0.4
Missing/Age Range	268	1.4%	NA
<b>Total</b>	<b>19,062</b>	<b>100.0%</b>	<b>8.4</b>

Notes: Children are defined as being 17 years of age or younger at the time of victimization, adults are defined as being 18 years of age or older at the time of victimization. Ages that were entered as a range, e.g.; 8 – 10, are treated as missing data. Victimization rate is expressed per 10,000.

Sources: SCIBRS, SLED; population estimates, ORS.

## Sexual Violence Victimization by Age 2007 - 2011

*The highest sexual violence victimization rate was among girls in the fifteen to seventeen years old age group, followed by girls in the ten to fourteen years old age group.*

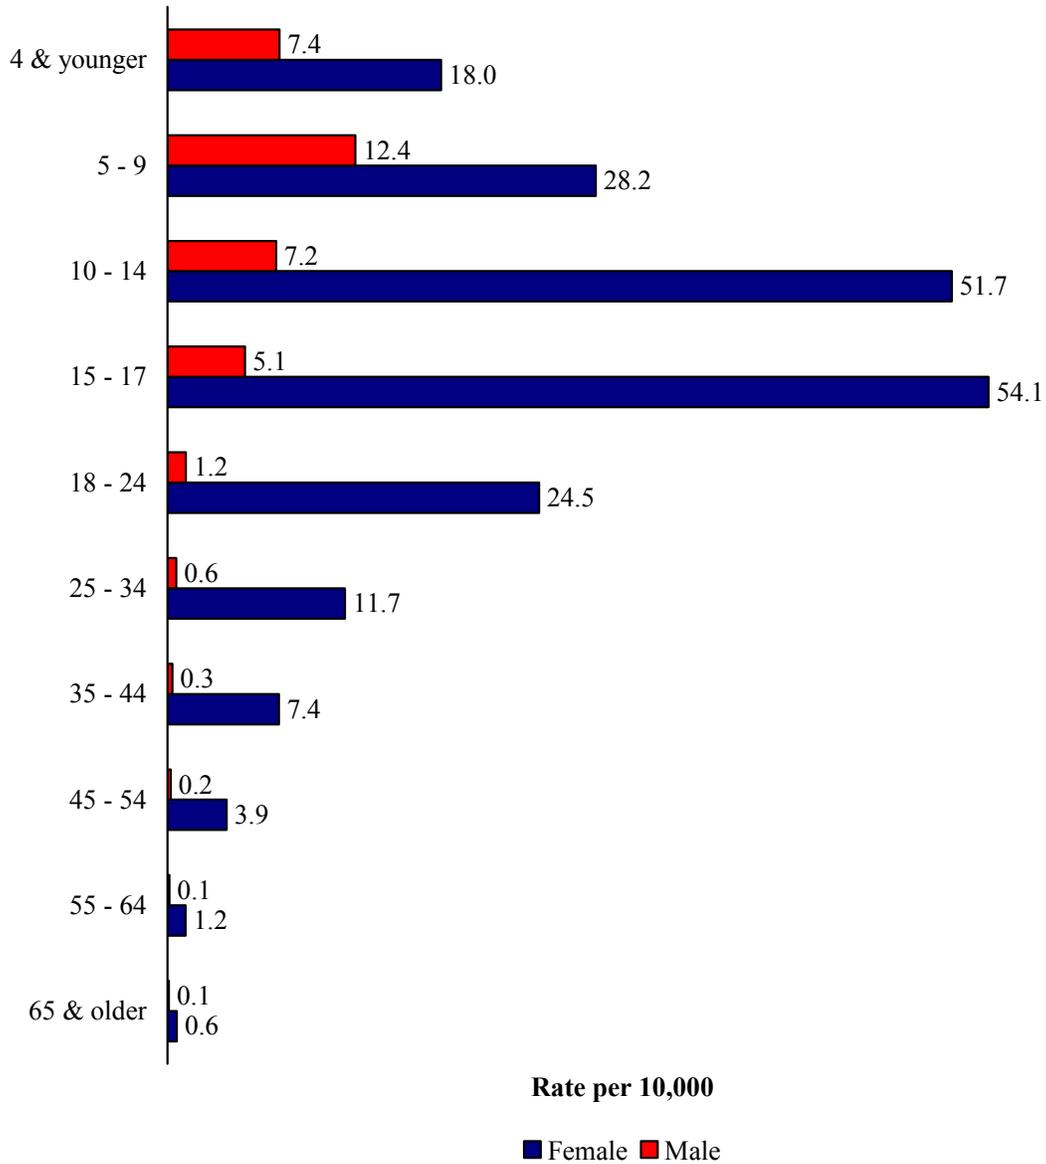

**SEXUAL VIOLENCE VICTIMS BY AGE AND SEX  
2007 – 2011**

Age	Female		Male	
	Number of Victims	Rate	Number of Victims	Rate
<b>Children</b>	<b>9,612</b>	<b>36.1</b>	<b>2,312</b>	<b>8.3</b>
4 & younger	1,365	18.0	583	7.4
5 - 9	2,064	28.2	943	12.4
10 - 14	3,719	51.7	543	7.2
15 - 17	2,464	54.1	243	5.1
<b>Adults</b>	<b>6,528</b>	<b>7.2</b>	<b>338</b>	<b>0.4</b>
18 - 24	2,706	24.5	142	1.2
25 - 34	1,756	11.7	87	0.6
35 - 44	1,120	7.4	47	0.3
45 - 54	659	3.9	32	0.2
55 - 64	179	1.2	17	0.1
65 & older	108	0.6	13	0.1
<b>Total</b>	<b>16,140</b>	<b>14.0</b>	<b>2,650</b>	<b>2.4</b>

Notes: Children are defined as being 17 years of age or younger at the time of victimization, adults are defined as being 18 years of age or older at the time of victimization. Victimization rate is expressed per 10,000. A total of 332 victims were of unknown sex or their age was either missing or entered as a range.

Sources: SCIBRS, SLED; population estimates, ORS.

## Sexual Violence Victimization by Age and Sex 2007 - 2011

*Whites accounted for 63% of sexual violence victims, Blacks accounted for 35.7%.*

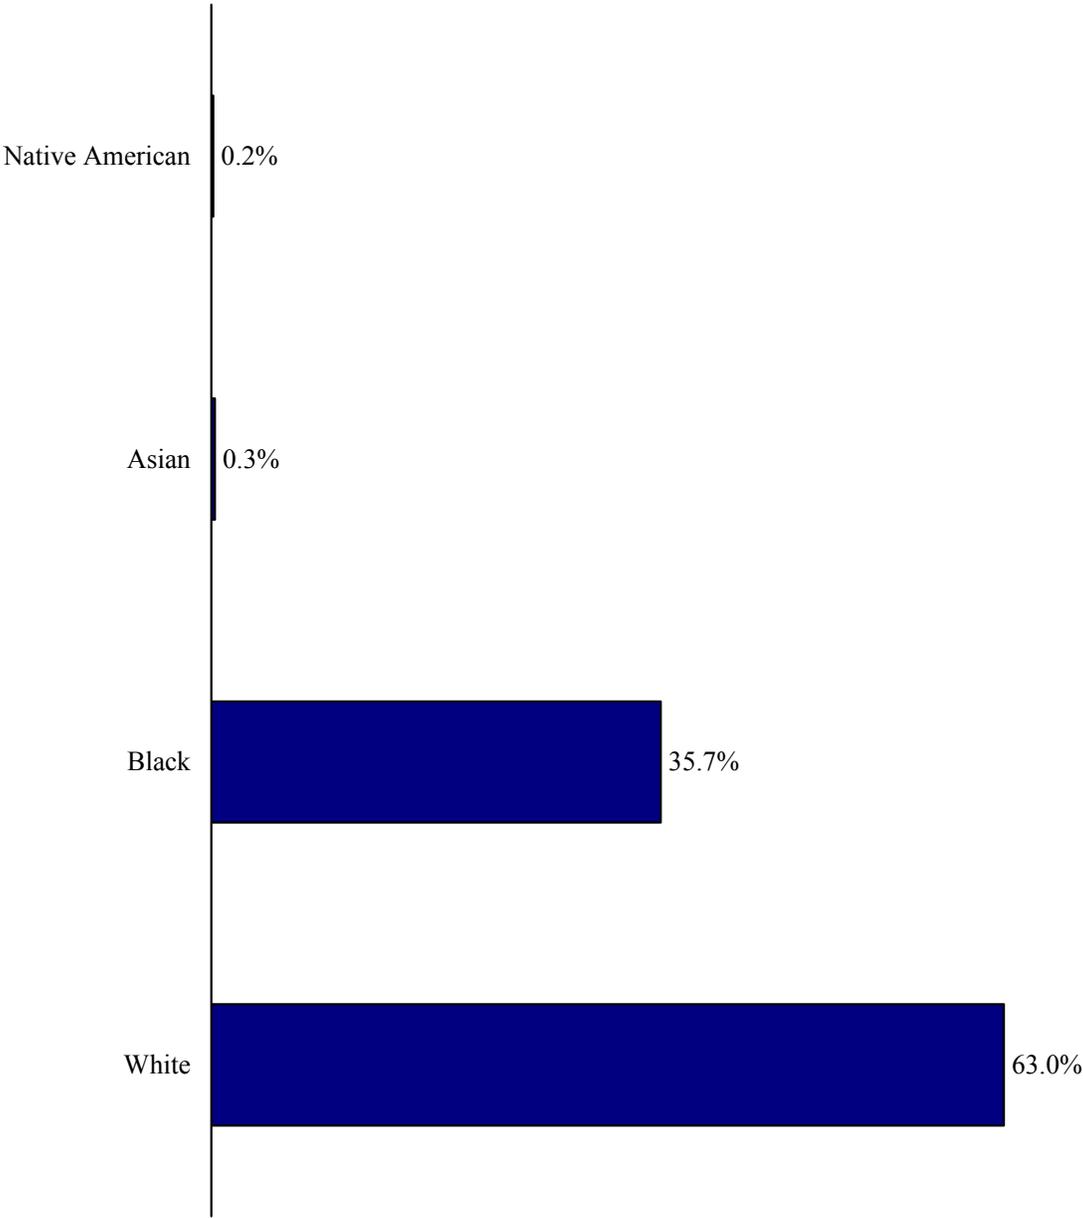

**RACE:** SCIBRS classifies race into four categories: Asian, Black, Native American and White.

**SEXUAL VIOLENCE VICTIMS BY RACE  
2007 – 2011**

<b>Race</b>	<b>Number of Victims</b>	<b>Percent</b>
Asian	56	0.3%
Black	6,812	35.7%
Native American	31	0.2%
Unknown	151	0.8%
White	12,012	63.0%
Total	19,062	100.0%

Source: SCIBRS, SLED.

# Sexual Violence Victims by Race 2007 - 2011

*The sexual violence victimization rate was 14.1% higher among the Non-White population than among the White population.*

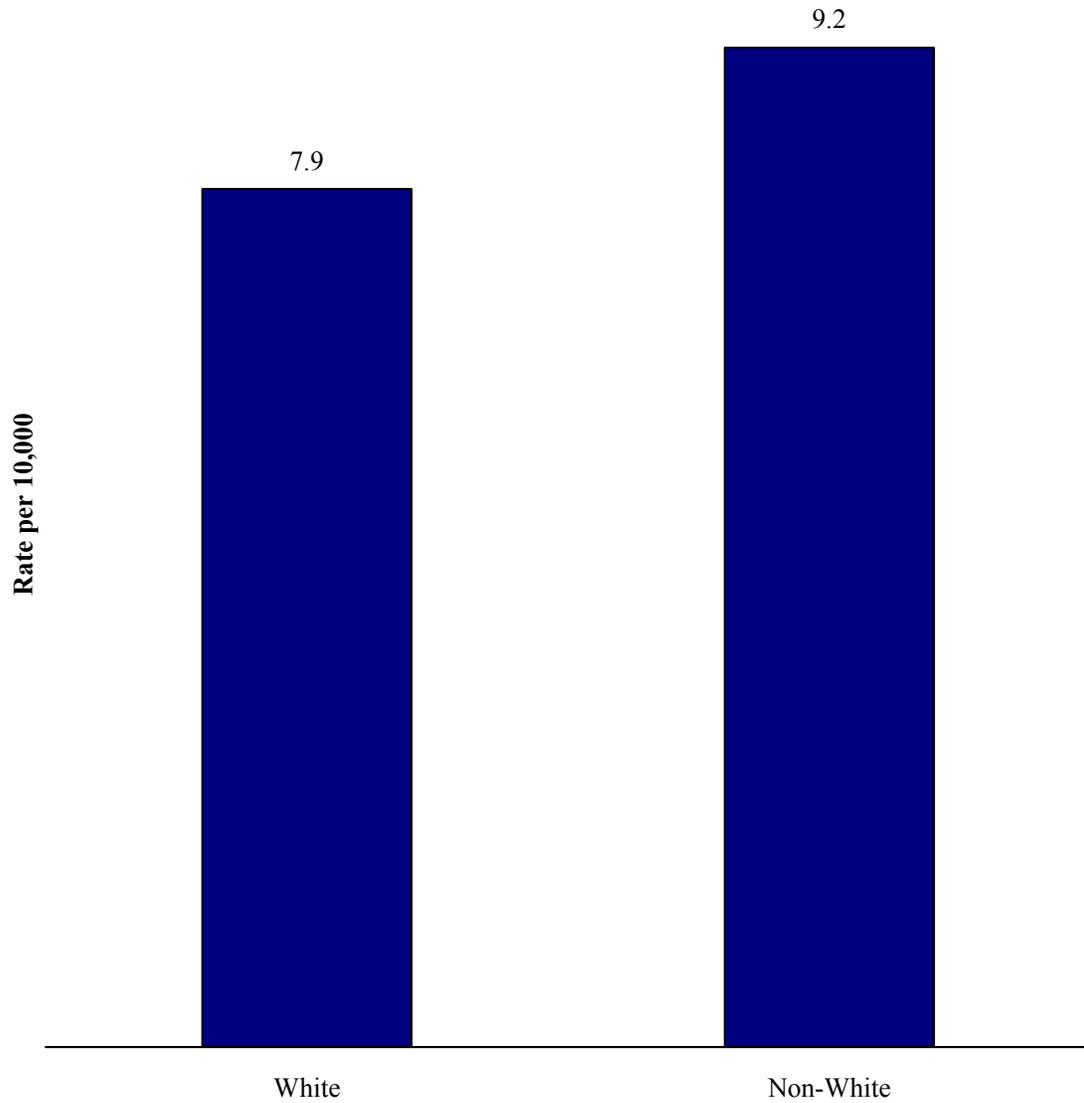

**SEXUAL VIOLENCE VICTIMS BY RACIAL GROUP  
2007 – 2011**

<b>Racial Group</b>	<b>Number of Victims</b>	<b>Percent</b>	<b>Rate</b>
Non-White	6,899	36.2%	9.2
Unknown	151	0.8%	NA
White	12,012	63.0%	7.9
Total	19,062	100.0%	8.4

Notes: SCIBRS categorizes race as Asian, Black, Native American or White. The ORS population estimates provide different racial categories. Consequently, the categories of White and Non-White (Non-White was defined as Asian, Black or Native American in SCIBRS, Non-White was defined as all groups other than White in the ORS population estimates) were used to calculate victimization rates. The victimization rate is expressed per 10,000.

Sources: SCIBRS data, SLED; population estimates, ORS.

# Sexual Violence Victimization by Racial Group 2007 - 2011

*The sexual violence victimization rate was highest among Non-White females.*

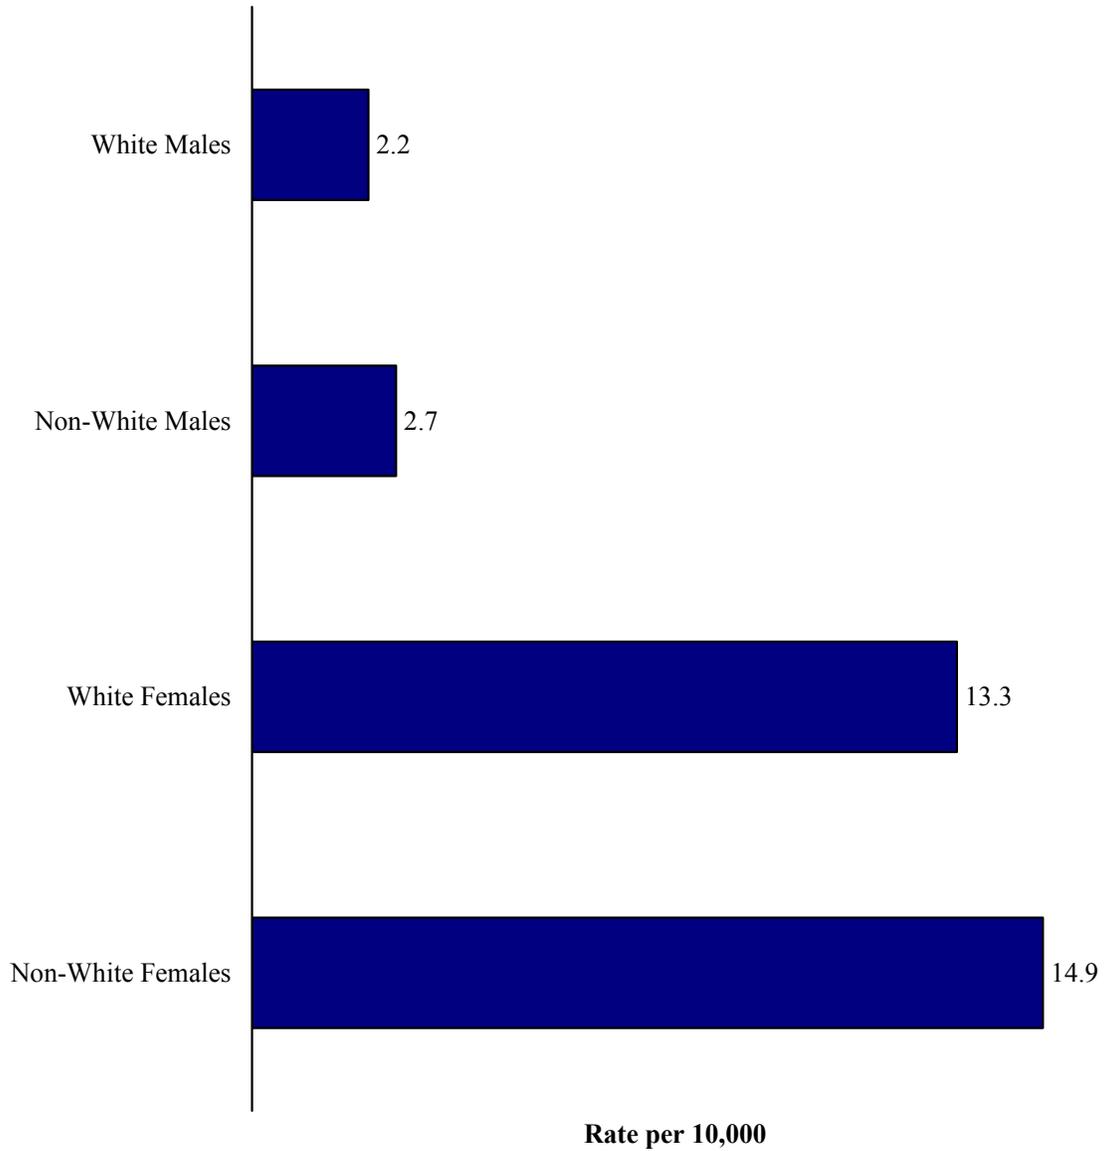

**SEXUAL VIOLENCE VICTIMS  
BY RACIAL GROUP AND SEX  
2007 – 2011**

<b>Racial Group &amp; Sex</b>	<b>Number of Victims</b>	<b>Percent</b>	<b>Rate</b>
Non-White Females	5,914	31.0%	14.9
Non-White Males	983	5.2%	2.7
Unknown	154	0.8%	NA
White Females	10,334	54.2%	13.3
White Males	1,677	8.8%	2.2
Total	19,062	100.0%	8.4

Notes: SCIBRS categorizes race as Asian, Black, Native American or White. The ORS population estimates provide different racial categories. Consequently, the categories of White and Non-White (Non-White was defined as Asian, Black or Native American in SCIBRS, Non-White was defined as all groups other than White in the ORS population estimates) were used to calculate victimization. The victimization rate is expressed per 10,000.

Sources: SCIBRS data, SLED; population estimates, ORS.

# Sexual Violence Victimization by Racial Group and Sex 2007 - 2011

*The sexual violence victimization rate among Non-Hispanics was higher than the sexual violence victimization rate among Hispanics.*

**ETHNICITY:** SCIBRS categorizes ethnicity into two groups: Hispanic and Non-Hispanic. SCIBRS measures ethnicity separately from race. As a result, a victim of sexual violence is classified into both a racial category and an ethnic category.

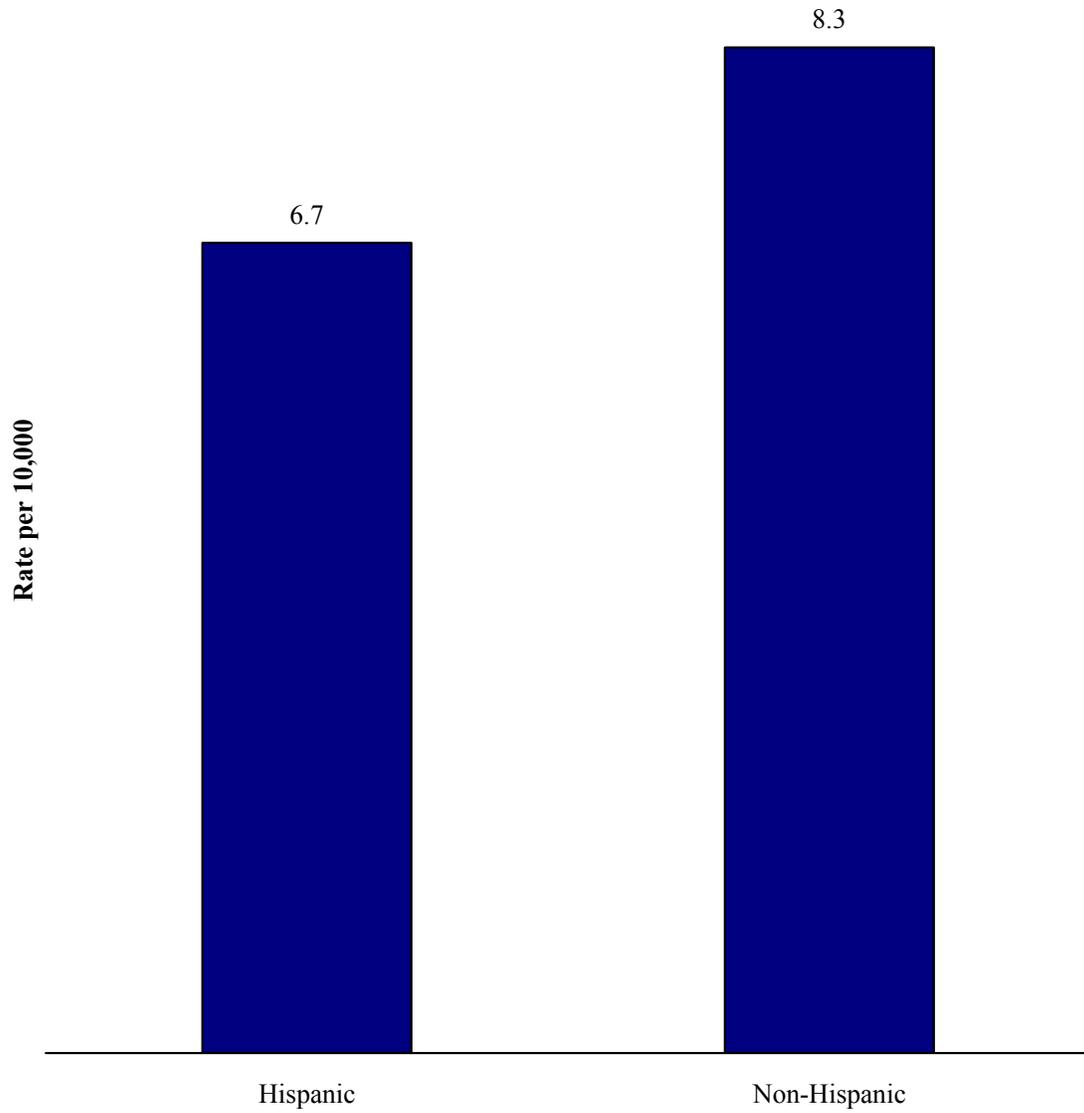

**SEXUAL VIOLENCE VICTIMS BY ETHNICITY  
2007 – 2011**

<b>Ethnicity</b>	<b>Number of Victims</b>	<b>Percent</b>	<b>Rate</b>
Hispanic	700	3.7%	6.7
Non-Hispanic	18,089	94.9%	8.3
Unknown	273	1.4%	NA
Total	19,062	100.0%	8.4

Note: Victimization rate is expressed per 10,000.

Sources: SCIBRS, SLED; population estimates, ORS.

# Sexual Violence Victimization by Ethnicity 2007 - 2011

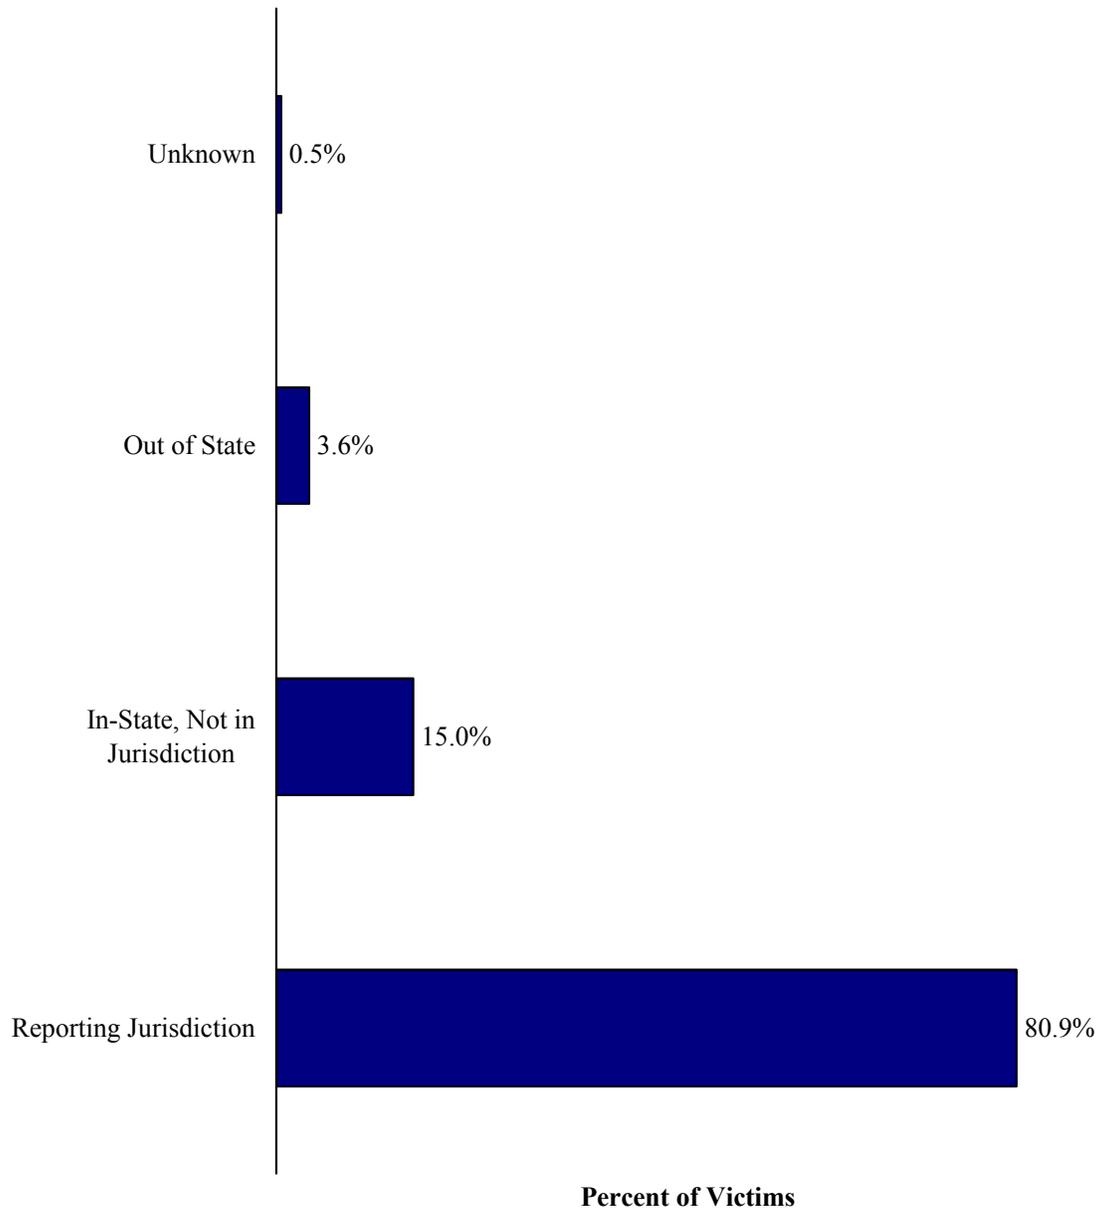

*Sexual violence victims were most frequently residents of the responding jurisdiction.*

**SEXUAL VIOLENCE VICTIMS BY PLACE OF RESIDENCE  
2007 – 2011**

<b>Place of Residence</b>	<b>Number of Victims</b>	<b>Percent</b>
In-State, Not in Jurisdiction	2,855	15.0%
Out of State	684	3.6%
Reporting Jurisdiction	15,422	80.9%
Unknown	101	0.5%
Total	19,062	100.0%

Note: Place of residence refers to the victim's place of residence.  
Source: SCIBRS, SLED.

## Sexual Violence Victims by Residence 2007 - 2011

*The most frequently reported type of victim to offender relationship among sexual violence victims involved a relationship where the victim and offender knew one another, but there was no family, marital or romantic relationship.*

**VICTIM TO OFFENDER RELATIONSHIP:** SCIBRS records the relationship between the victim and offender into one of 26 categories. For the purpose of this report, seven categories encompassing victim/offender relationships were constructed: ex-spouse, family, known, marital, romantic, stranger and relationship unknown. The easiest way to understand the victim to offender relationship is to substitute the phrase, “the victim was” followed by the type of relationship; e.g., if the victim to offender relationship category is family, the victim was a family member of the offender.

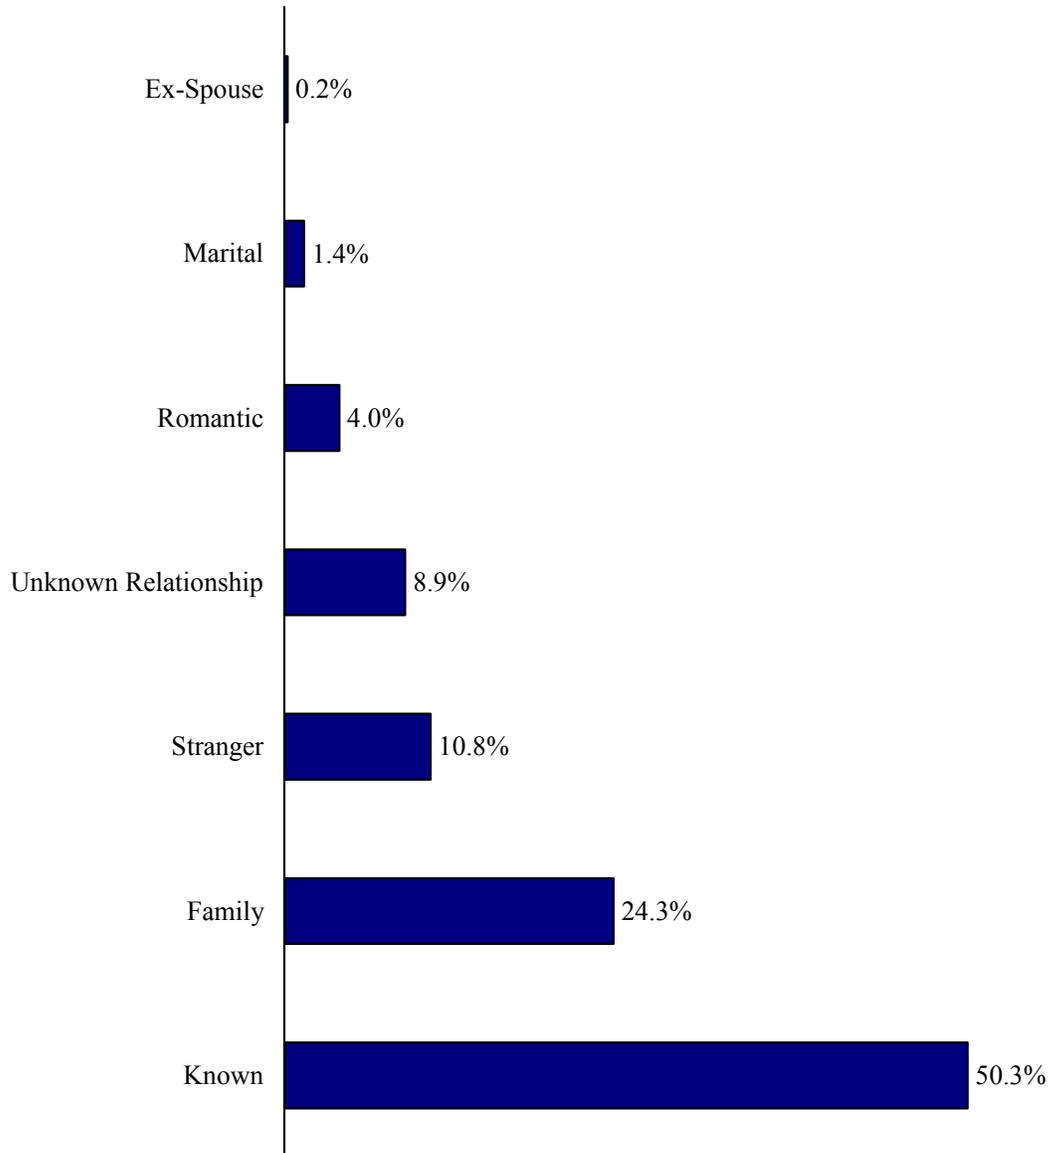

**SEXUAL VIOLENCE VICTIM/OFFENDER REALTIONSHIPS  
2007 – 2011**

<b>Victim Was:</b>	<b>Number of Victim/ Offender Relationships</b>	<b>Percent</b>
Ex-Spouse	51	0.2%
Family	5,229	24.3%
Known	10,854	50.3%
Marital	312	1.4%
Romantic	873	4.0%
Stranger	2,321	10.8%
Unknown Relationship	1,919	8.9%
Total	21,559	100.0%

Notes: SCIBRS allows up to 10 victim to offender relationships to be recorded per victim in order to provide complete data in cases where more than one offender is involved. As a result of multiple offender involvement, the number of victim to offender relationships exceeds the number of victims.

Source: SCIBRS, SLED.

# Sexual Violence Victim/Offender Relationships 2007 - 2011

*Known victim/offender relationships were the most frequently reported category of victim/offender relationship for both children and adults. Family was the second most frequently reported victim/offender relationship among children while stranger was the second most frequently reported victim/offender relationship reported among adults.*

**VICTIM TO OFFENDER RELATIONSHIP:** SCIBRS records the relationship between the victim and offender into one of 26 categories. For the purpose of this report, seven categories encompassing victim/offender relationships were constructed: ex-spouse, family, known, marital, romantic, stranger and relationship unknown. The easiest way to understand the victim to offender relationship is to substitute the phrase, “the victim was” followed by the type of relationship; e.g., if the victim to offender relationship category is family, the victim was a family member of the offender.

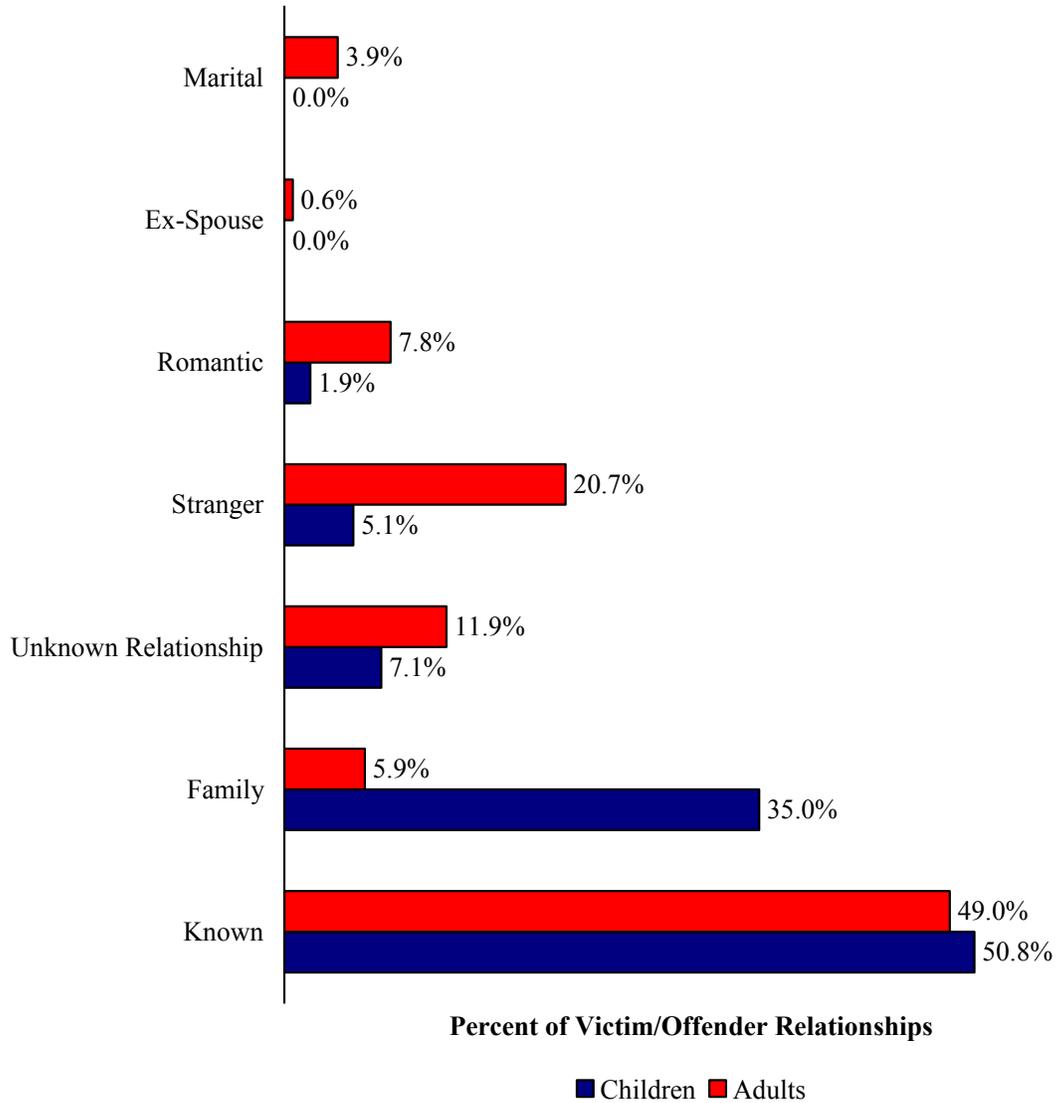

**SEXUAL VIOLENCE  
VICTIM/OFFENDER RELATIONSHIPS  
COMPARING CHILDREN AND ADULT VICTIMS  
2007 – 2011**

<b>Victim Was:</b>	<b>Percent of Child Victims</b>	<b>Percent of Adult Victims</b>
Ex-Spouse	<0.1%	0.6%
Family	35.0%	5.9%
Known	50.8%	49.0%
Marital	<0.1%	3.9%
Romantic	1.9%	7.8%
Stranger	5.1%	20.7%
Unknown Relationship	7.1%	11.9%
Total	100.0%	100.0%

Notes: Children are defined as being 17 years of age or younger at the time of victimization, adults are defined as being 18 years of age or older at the time of victimization. Percent is based on the total number of victim to offender relationships for each age group.

# **SUMMARY**

Most statewide indicators of sexual violence victimization declined or remained the same from 2007 to 2011. The total sexual violence victimization rate decreased 5.7% over the five year period. The invasive sexual violence victimization rate decreased 6%, and the forcible fondling victimization rate declined 7.9. The rate of sexual violence against all children was unchanged from 2007 to 2011. However, among children the victimization rate for children four years old or younger increased 20.2%, the victimization rate among five to nine year old children decreased 1.9%, the victimization rate among ten to fourteen year olds increased 0.7% and the victimization rate among fifteen to seventeen year olds decreased 11.6%. Among adults, the sexual violence victimization rate decreased 11.4%. The rate of sexual violence involving family members did not change from 2007 to 2011. Sexual violence victimization rates involving victim to offender relationships where the victim and offender knew each other but did not have a family, marital or romantic relationship decreased 2.3% and the sexual violence victimization rates involving strangers decreased 36.4%.

In the shorter term, most statewide indicators of sexual violence increased. From 2010 to 2011, the sexual violence victimization rate increased 6.4%, the invasive sexual violence rate increased 4.4% and the forcible fondling victimization rate increased 6.1%. It is worth noting that each of these one year increases represent the only annual increase for these offense categories from 2007 through 2011. From 2010 to 2011, the rate of sexual violence victimization increased 2.3% among all children, increased 5.1% among children four years old and younger, increased 2% among children from five to nine years old, increased 2.1% among children from ten to fourteen years old, but decreased 1.5% among children fifteen to seventeen years of age. Sexual violence victimization among adults increased 14.7% that year.

Demographically, there were notable differences in sexual violence victimization based on victim age, race, sex and ethnicity. The largest percentage (63%) of sexual violence victims were White; however the sexual violence victimization rate among Non-Whites was 14.1% higher than the victimization rate among Whites. Hispanics comprised 3.7% of sexual violence victims and the sexual violence victimization rate among Non-Hispanics was 23.8% higher than the victimization rate among Hispanics. Age and sex proved to be especially important demographic factors, factors that seem crucial to understanding patterns of violent sexual victimization. Children (seventeen years of age or younger) accounted for 62.6% of sexual violence victims and the sexual violence victimization rate among children was 5.6 times the sexual violence victimization rate among adults. Women and girls accounted for 85.8% of sexual violence victims, while men and boys accounted for 14.2% of victims. The sexual violence victimization rate among females was 5.8 times the victimization rate among males. Girls from fifteen to seventeen years of age experienced the highest sexual violence victimization rate, 54.1 per 10,000, of any sex/age group, closely followed by girls from ten to fourteen years of age who had a victimization rate of 51.7. The next highest victimization rates were among girls five to nine years of age with a sexual violence victimization rate of 28.2 and women from eighteen to twenty-four years of age with a rate of 24.5 per 10,000. The sexual violence victimization rate among girls was 36.1 per 10,000. By way of comparison, the sexual violence victimization rate among boys was 8.3, among women

the sexual violence victimization rate was 7.2 and among men the sexual violence victimization rate was 0.4 per 10,000. It is noteworthy that while girls and young adult women were at the highest risk of sexual violence, boys, particularly those younger than fifteen years of age, also constituted a vulnerable population.

Sexual violence was reported most frequently late at night (midnight) but also spiked during the day at eight o'clock in the morning, noon and three o'clock in the afternoon. However the temporal patterns of sexual violence victimization were to a large extent, dependent upon the age of the victim. Adult victimization occurred infrequently during the daylight hours with small spikes at eight o'clock in the morning and noon, then increased gradually throughout the evening hours, peaked at midnight and gradually declined during the early morning hours. By way of contrast, among children the temporal patterns of sexual violence included daytime spikes that were much larger than those that occurred among adults. Among children, spikes in violent sexual victimization occurred at several times: midnight, eight o'clock in the morning, noon and three o'clock in the afternoon. Victimization dropped off, sometimes dramatically, after each of these spikes in victimization. It is possible that the daytime spikes in child victimization might be related to activities and behaviors associated with school or day care attendance such as leaving home and going to school, eating lunch, participating in unsupervised activities during the lunch-hour and going to day care or returning home after school.

Victim age was also associated with differential patterns related to victim to offender relationships. While both children and adults were most often victimized by someone they knew but with whom they had no family, marital or romantic relationship, there were other important differences in victim to offender relationships between adults and children. Adults were victimized most often by someone they knew, secondarily by strangers and much less frequently by family members. Children were victimized most often by someone they knew, secondarily by family members and much less frequently by strangers. While "stranger danger" cannot and should not be dismissed as a preventive strategy for child safety, the findings indicate that violent sexual victimization by a stranger is a much greater problem for adults than it is for children.

The geographic pattern of sexual violence is difficult to characterize in a meaningful way. From 2007 to 2011, twenty-three counties experienced declines in the sexual violence victimization rate, twenty-one counties experienced increases and two counties experienced no changes in their rates. At the same time, twenty-one counties experienced declines in the invasive sexual violence rate, twenty-four experienced increases and one county's rate remained the same. The forcible fondling rate declined in twenty-two counties, increased in twenty-two counties and remained the same in two counties. The demographic profiles of sexual violence victims varied greatly among the counties. The real value of the county level data is to provide a starting point for more detailed analysis at that level. Similarly, the county rankings provide worthwhile information, but must be understood within the local context. Counties differ demographically, culturally, in terms of the availability of resources, in the ways in which local law enforcement officials respond to sexual violence reports and in any number of ways which might have an impact on the degree to which sexual violence occurs or is

reported. County population is another factor which must be considered when examining county trends and rankings. Small changes in the number of sexual violence victims in counties with comparatively small populations can result in seemingly (and perhaps deceptively) large changes in the victimization rates and have an inordinate impact on county rankings. Consequently, there are a number of factors that should be considered when looking at this information; i.e., it is important to understand county trends and rankings in the proper context.

Finally this report illustrates the complexity of sexual violence and underlines the importance of achieving a better understanding of the problem in order to address it. A factor that contributes greatly to this complexity is the age of the victim. Not only are children targeted as victims of sexual violence at a much higher rate than adults, but the circumstances of sexual violence against children and the circumstances of sexual violence against adults differ in important ways. Children are at the greatest risk of victimization at midnight, but also tend to be victimized at specific daylight hours that may be related to patterns associated with school or day care schedules. Children are more at risk of sexual attacks by family members than from strangers, while adults are much more likely to be sexually victimized by strangers than by family members. Girls are at the highest risk of sexual violence, but boys experienced higher levels of sexual violence than adult women and the victimization rate for younger boys was much higher than the rate for older boys. Any effective preventive or protective measures need to take these age related differences into account. Coming to grips with these complexities is a necessary first step for any realistic efforts to address and reduce sexual violence.
